NOTIFICATION

FINAL ESTIMATE OF WHEAT CROP IN THE PUNJAB FOR THE YEAR, 2009-2010

AREA

According to final estimate of wheat crop during Rabi 2009-10, the area is placed at about 17.084 million acres (Irri=15.727 million acres, Un-Irri= 1.357 million acres) as compared to 16.893 million acres (Irri=15.183 million acres, Un-Irri=1.710 million acres) sown last year. It shows an increase of about 3.6 % in irrigated and decrease about 20.6% in un-irrigated tract. However, it is an overall increase of about 1.1 % over the previous year which is attributed to the following :

1. Better returns received from last year crop encouraged the growers to put more area under wheat crop by shifting area of other minor crops i.e. Oilseed, Potato, Gram and Masoor etc in irrigated tract.
2. Lack of rainfall / less soil moisture at sowing time restricted acreage in un-irrigated areas.

PRODUCTION

According to final estimate of wheat crop rabi 2009-10, the production of wheat is assessed to be at about **17.919 million tonnes**(Irri = 17.488 million tonnes, Un-irri= 0.431 million tonnes) as compared to **18.420 million tonnes** (Irri = 17.406 million tonnes, Un-irri= 1.014 million tonnes) produced last year. The production thus shows a decrease of about 2.7% over the previous year which is attributed to :-.

1. In irrigated tract crop was sown at appropriate time , availability / application of fertilizers and weedicides remained smooth and adequate which sustained the average yield .
2. In barani areas crop remained under stress throughout the season by severe shortage of rainfall / soil moisture , caused decline in production.
3. Sudden increase in temperature during the second fortnight of March (grain formation stage) affected the crop to some extent.
